The Morning Intel SAMPLE

Friday, October 30, 2026 · Vol. 1 No. 12
Sample edition · Anytown, USA

Fictional content for layout testing · Research cutoff Fri Oct 30, ~5:45 AM ET · Highlighted = vendor or unverified claim

BLUF

1. **Budget:** Appropriators in the sample Congress agreed to a **six-week continuing resolution**, so new starts stay frozen until mid-December. Plan program execution at last year's rate.
2. **S&T:** The Example Research Lab posted a **$24M broad agency announcement** for resilient sensing, with white papers due Dec 4. No change to the two tracked program elements.
3. **AI/agents:** An open-weights model topped a public coding leaderboard (vendor-reported). A popular agent framework added scheduled jobs that deliver to email.
4. **Today:** 48–52°F and dry for the 8 AM walk: **light jacket, no umbrella**. High of 64°F. Rain arrives Sunday afternoon.

WEATHER · ANYTOWN

64°F	43°F	5%	18mph
FRI HIGH · SUNNY	FRI NIGHT LOW	RAIN CHANCE	NW GUSTS · 5–10 SUST.

Fri night: clear and cool, NW 5 mph. Sat: partly sunny, high 61°F. Sun: showers likely after 2 PM (60%).

Morning walk, 7:30–8:30 AM: 48–52°F, dry, light wind. Light jacket yes, umbrella no.

Calm early, then NW gusts near 18 mph after noon. Evening commute: 60°F and dry.

RUNNING WINDOW

- **Best time:** 08:00: 50°F (feels 48°F), rain chance 0%, wind 4 mph
- Also OK: 09:00: 54°F, rain chance 0%, wind 5 mph
- Daylight: sunrise 07:28, sunset 18:12

Source: NWS API, gridpoint XXX/10,20 (forecast and hourly), fetched Fri Oct 30 at 5:28 AM ET. NWS last updated the forecast at 4:59 AM ET.

PERSONAL · EMAIL + CALENDAR

- [ ] CLEAR **Calendar:** nothing on it before 2 PM.
- [ ] UPCOMING **Today, 2:00–2:30 PM:** project sync (video). Agenda was shared yesterday.
- [ ] ACTION **Library:** two books due Monday; renew online or return by Sunday. Open
- [ ] ALERT **Streaming service:** a new device signed in Thu evening. If that wasn't you, change the password.
- [ ] **Pointers:** utility bill posted (AutoPay on 11/20); a package is out for delivery today.

BUDGET & APPROPRIATIONS

Six-week CR clears both chambers; new starts stay frozen

The sample House and Senate passed a continuing resolution on Oct 29 that funds the government at last year's levels through Dec 11. It carries no new-start exceptions for the tracked research accounts and no anomalies for test ranges.

Committee aides said a full-year defense bill is "possible but not likely" before the holidays. Two staff summaries put the odds of a second CR at better than even. example.gov/appropriations/cr-text (Oct 29)

For the tracked PEs: plan at the prior-year rate past Dec 11 and keep any new-start phasing CR-proof. example.org/crs-report-0000

LAB S&T

Example Research Lab opens a $24M call for resilient sensing

The lab posted a broad agency announcement on Oct 28 for low-power, jam-resistant sensing. It plans **4–6 awards** of about $4M each over three years. White papers are due Dec 4 and full proposals in February.

The call names two focus areas: adaptive antennas and on-board signal processing. Neither one maps directly onto the tracked program elements, but the second overlaps with last year's processing roadmap. example.gov/opportunities/BAA-0000 (Oct 28)

DEFENSE

Sample Space Command awards $61M ground-segment task order

A ground-systems company said it won a $61M task order to modernize satellite command software over five years. The award does not yet appear in the daily contract announcements, so the figure is vendor-reported.

The work moves legacy scheduling tools to a shared cloud environment and should cut operator workload, the company said. example.com/press/ground-segment-award (Oct 29)

AI & TECH

Open-weights coding model tops a public leaderboard

A research startup released open weights for a 70B-parameter coding model on Oct 29 under a permissive license. Its launch post claims the model beats every closed model on a public coding benchmark. Independent runs have not been published yet.

The weights and a model card are on a public model hub. Early user reports describe strong refactoring but weak long-context recall. example.ai/blog/open-coder (Oct 29)

Standards body publishes draft guidance on AI system audits

A sample national standards body released a draft profile for auditing deployed AI systems on Oct 28. It asks operators to log model versions, evaluation results and incident reports. Comments are open for 60 days. example.gov/ai-audit-draft (Oct 28)

AI TRENDS ON X

These are X trending-story summaries (machine-generated from posts) and were not checked against primary sources.

"Small models, big context": developers debate local agents

Posts compare running small local models with long context windows against hosted frontier models for coding agents. Most of the discussion turns on cost and privacy rather than benchmark scores.

LEARNING

Free course module on causal inference goes live

An open-course provider added a six-week module on causal inference for working analysts, with weekly problem sets and a capstone. It is free to audit. example.edu/courses/causal-inference (Oct 27)

FITNESS SCIENCE

Trial: two short strength sessions a week match three longer ones

A 12-week randomized trial of 120 adults found that two 30-minute full-body sessions a week produced the same strength gains as three 45-minute sessions. The authors note the sample was young and untrained, so the result may not carry over to experienced lifters. doi.org/10.0000/example.2026.001

Takeaway: consistency beat volume in this group. One trial is not a consensus.

AGENT FRAMEWORKS

Agent framework adds scheduled jobs with email delivery

An open-source agent framework shipped scheduled jobs that run a skill on a cron schedule and deliver the final answer to chat or email, with file attachments. Jobs can carry the previous run's output forward to avoid repeats. github.com/example/agent-framework/releases (Oct 29)

> **Worth stealing:** pass yesterday's issue into today's run so the brief can drop repeat stories automatically, instead of keeping a separate dedupe list.

No other framework releases since Tuesday.

WEEKEND OUTINGS · FRI OCT 30 – SUN NOV 1

Free or under $10, reachable by transit from downtown. Dry Saturday, showers Sunday afternoon.

EASY **City museum free day, Sat Oct 31, 10 AM–5 PM.** New photography gallery and a family workshop at 1 PM. example.org/museum/free-day — Free, **Central Station**

EASY **Riverside farmers market, Sat Oct 31, 8 AM–1 PM.** Harvest produce, cider and live folk music. example.org/markets/riverside — Free entry, **River St**

EASY **Botanical garden fall walk, Sun Nov 1, 10 AM.** A guided one-hour walk on paved paths. example.org/garden/events — $5, **Garden Ave**

EASY **Library author talk, Sun Nov 1, 2 PM.** A local historian on the city's old rail lines. Indoors, so good for Sunday's rain. example.org/library/talks — Free, **Main Library**

CHECK WITH DOCTOR **Community dance class, Sat Oct 31, 4 PM.** A beginner swing class with lots of quick turns. example.org/rec/dance — $8, **Rec Center**

Left out on purpose: races, haunted trails on uneven ground, and anything that needs a car.

> **Stop if anything hurts during, after, or the next morning.**

COULD NOT VERIFY. (1) The $61M task order is vendor-reported only; it is not yet in the official contract announcements. (2) The coding-leaderboard claim comes from the vendor's launch post; no independent runs found. (3) The X trend summary was not checked against primary sources. (4) The committee-aide odds of a second CR come from one trade report.
